

# Why Converting To Gas Heat Is A Big Mistake.

If you're thinking of converting to gas heat, you're making a very big mistake. Because homeowners who panicked and converted to gas heat when oil prices were at an all-time high this summer are kicking themselves now that oil prices have dropped more than 50 percent.\*

Moreover, homeowners who spent \$5,000 to \$7,000 for a gas conversion<sup>†</sup> can expect a payback in 10 TO 20 YEARS – when they simply could have SPENT MUCH LESS upgrading their Oilheat equipment instead, and recouped their investment in one-third the time or sooner.

Your local Oilheat dealer has conservation advice and low-cost upgrading options that can help you save energy and money for many years to come. So, contact your Oilheat dealer today and visit our Web site before you do something you may regret.

**Keep your hard-earned money in your pockets where it belongs – contact your local Oilheat dealer and visit [www.nyoha.org](http://www.nyoha.org) today.**
